

Jenga Payment Gateway

E-commerce Online Payments

Who we are

Finserve was borne out of a deep-seated need to break down financial barriers. Finserve addresses these complex financial and lifestyle obstacles by employing a data & insight driven culture, and efficiency to build products that produce richer customer experiences.

We are Finserve and we are here to build relevant consumer-focused financial technology solutions for you and your organization.

What we do

Finserve combines deep knowledge of financial systems and wide-ranging technology experience to deliver quality solutions for the finance sector.

Jenga Payment Gateway

How it works

Jenga Payment Gateway is a simple step payment option that enables a variety of payment options for customers; ranging from cards to mobile wallets.

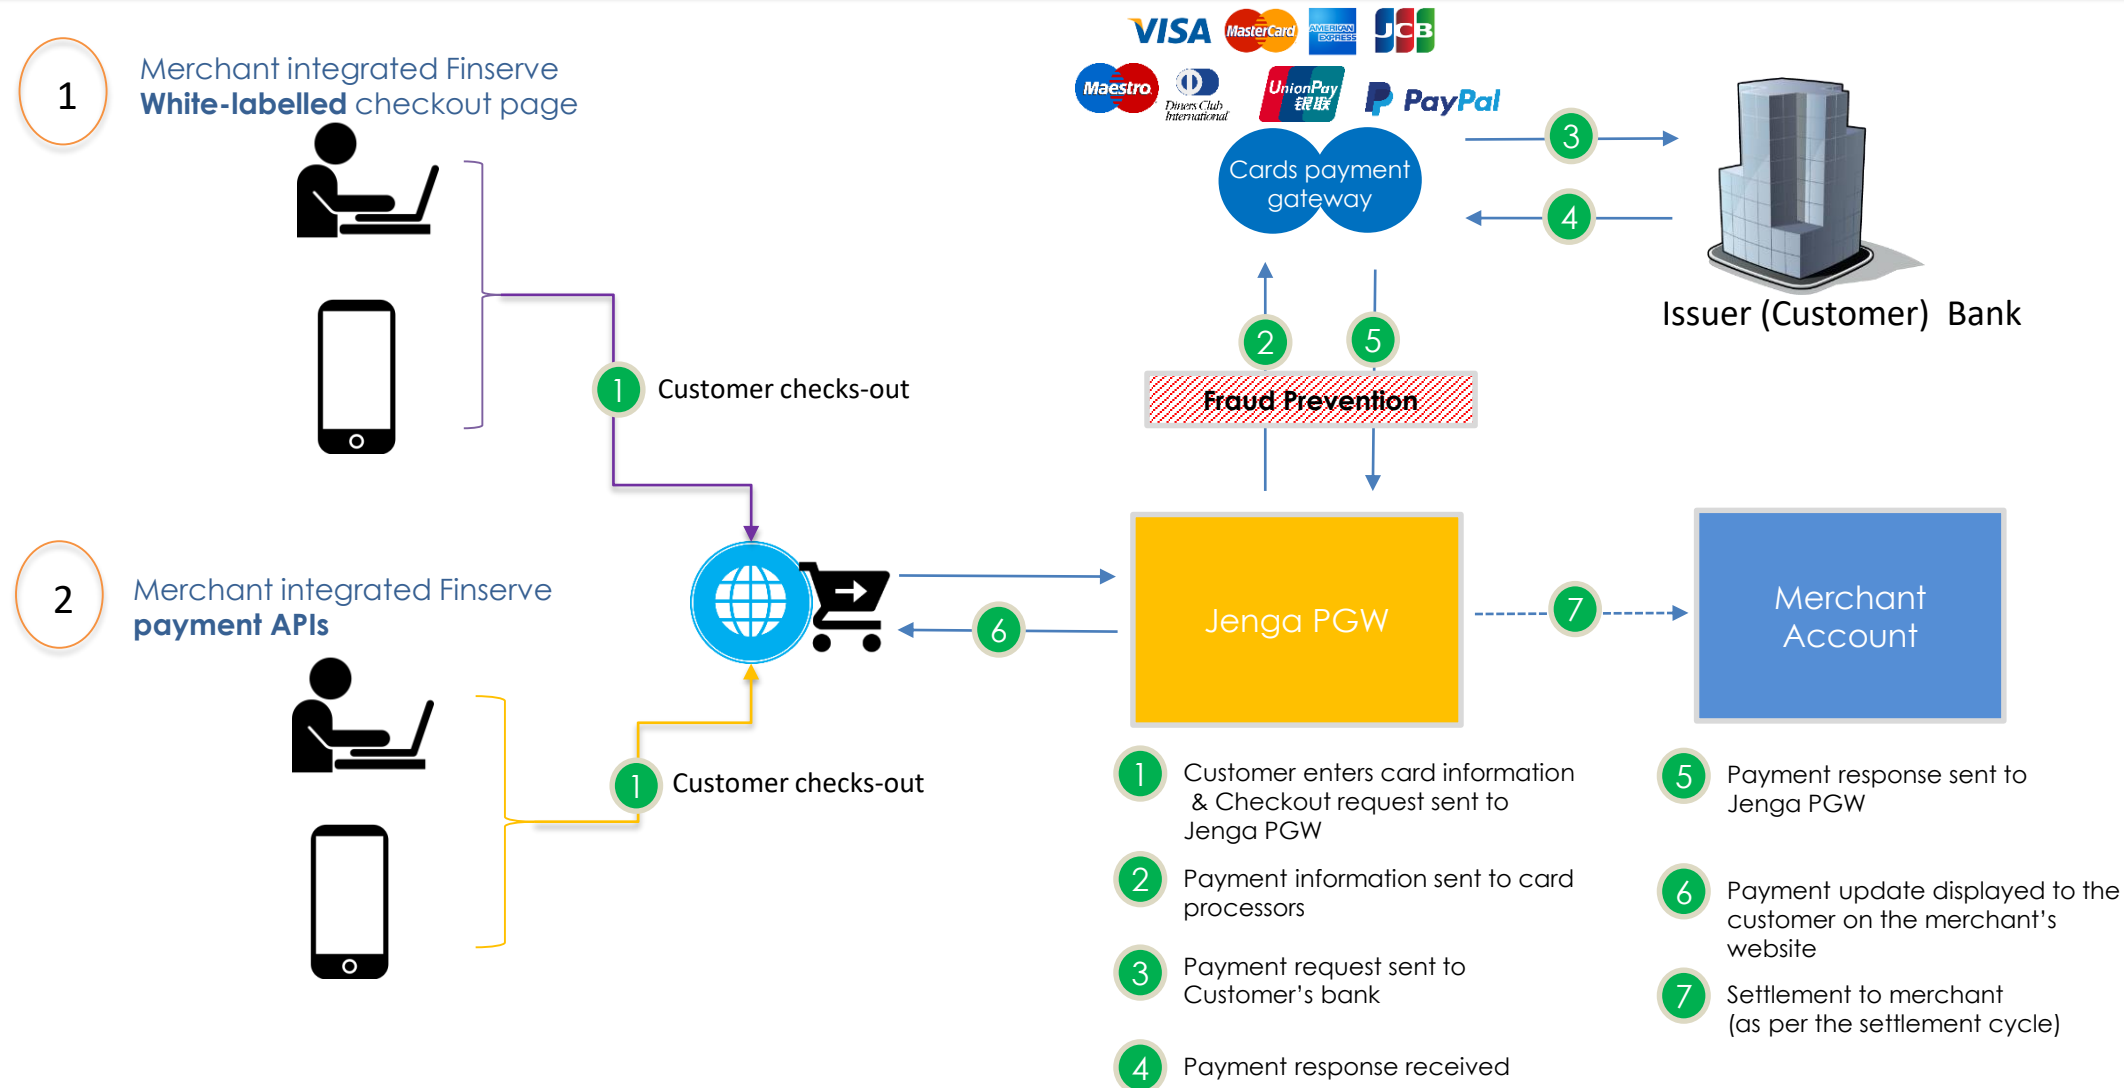

We offer the service through various models.

1. Checkout Integration to your website
2. Checkout integration to your mobile app
3. API Integration for customers with a customized checkout page
4. Payment link in the cases where a website is non-existent

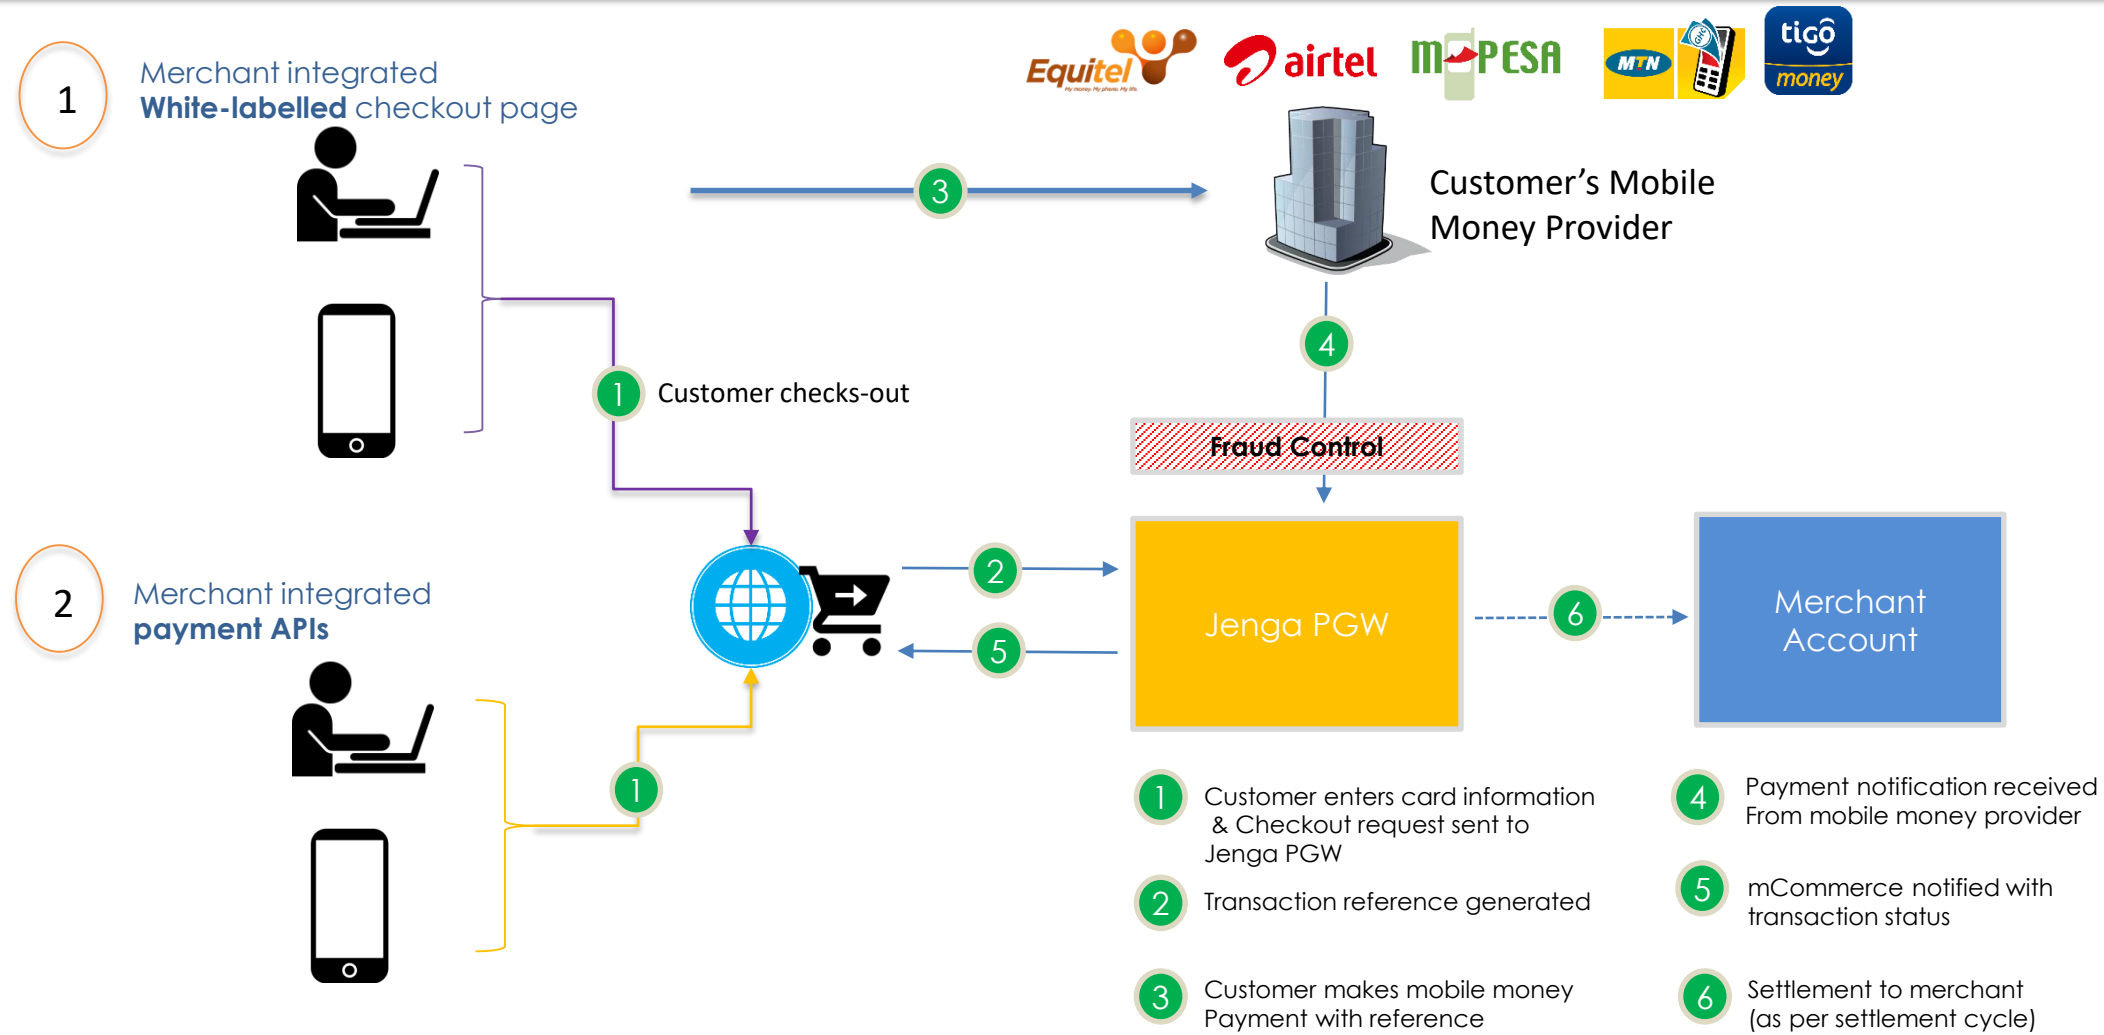

Steps for the customer:

1. Customer logs into merchant's website/social media page/calls in
2. Identifies service/product they are interested in and books
3. Customer checks out
4. System creates a bill
5. Customer selects to pay
6. Jenga PGW launches payment Interface and provides customer with the payment options
7. Customer selects their preferred payment option and pays
8. Money moves from customer's account/wallet to Merchant's Jenga wallet

Jenga Payment Gateway E-commerce Transaction Flow

Jenga Payment Gateway M-commerce Transaction Flow

The benefits of Jenga PGW include and not limited to:

- Simplified payment process
- Customer card details are submitted using industry's standard SSL secure connection. Details are encrypted and sent securely to the processing bank
- Single integration and on-boarding process
- Variety of payment options- Mastercard, VISA, AMEX, JCB, CUP, Diners; Mobile-Equitel, Mpesa ,Airtel Money, TIGO, MTN, and more.
- Exclusive acquiring bank for **AMEX** in the region.
- Provides a dashboard that enables a merchant to view all transactional activity and download reports.
- Dedicated support-24 hour contact center.
- Jenga provides a responsive payment page that can sent to the customer via Email or text message. Customer can access it using any device including mobile, laptop, tablet, etc.
- User Interface is white labelled allowing the merchant customize the check out page
